Mountain Weather Forecast

Bannau Brycheiniog (Brecon Beacons) National Park

Forecast valid from 06:00 on Monday 24 Jun 2024 until 23:59 on Tuesday 25 Jun 2024

Forecast Issued on Monday 24 Jun 2024 at 01:28

Confidence: High confidence for a lot of fine and warm weather next couple of days. Lower confidence regarding cloud details, mainly overnight. A risk of a few showers on Wednesday, which could be heavy and thundery, but confidence is low for this. Likely turning fresher from the west from Thursday, though details uncertain at this point.

Headline for Monday 24 Jun 2024: Cloud and mist or fog patches soon lifting to leave plenty of warm sunshine.

Mountain weather hazards on Monday 24 Jun 2024

Blizzards No Likelihood	**Heavy persistent snow** No Likelihood	**Storm force winds** No Likelihood
Gales No Likelihood	**Severe chill effect** No Likelihood	**Poor visibility** Low Likelihood
Thunderstorms No Likelihood	**Heavy persistent rain** No Likelihood	**Strong sunlight** High Likelihood

Forecast for Monday 24 Jun 2024

Weather: Areas of low cloud shrouding the peaks at first, giving some mist or fog patches and moderate or poor visibility, especially across western hills. Risk of the odd spot of drizzle. Cloud soon lifting above the hill tops, to leave a dry day with variable cloud cover, much improved visibility, and some strong warm sunshine developing at times. Light winds. Clear spells during the evening.

Chance of cloud-free hill tops above 600m: 40% at first. Becoming 100% during the morning, then becoming 70% later in the evening.

Low cloud and visibility: Areas of low cloud at first, especially in the west, base 200-400m, giving poor or very poor visibility. Clouds lifting above the summits fairly quickly after sunrise this morning, then good or very good visibility for the rest of the day. Perhaps some low cloud re-forming later in the evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Early hill fog making for difficult navigation at first. High UV index with light winds and warm temperatures, even at height. Adequate water and sun protection is highly recommended. Pollen levels are also very high.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:

Forecast for Tuesday 25 Jun 2024

Weather: Areas of low cloud at first, especially across western hills. Bright or sunny spells developing during the day, and remaining dry. Clear spells during the evening, perhaps with some low cloud re-forming later.

Maximum wind: Variable 5 to 10mph, with gusts 15mph or less.

Chance of cloud-free hill tops 600m: 60% at first, becoming 100% during the morning, then becoming 70% later in the evening.

Low cloud and visibility: Areas of cloud down to around 300-400m mainly early and late in the day, particularly for western parts of the Park. Cloud lifting and breaking above summits for the bulk of the day. Visibility locally very poor at height within cloud but generally good or very good away from cloud.

Temperature: **Valleys:** PS13C rising to PS23C.
At 600m: PS15C.
Freezing level: Above the hill tops throughout.
